MyAgrii User Manual

1. Introduction

Welcome to MyAgrii, the state-of-the-art digital agriculture platform designed to empower farmers and agronomists with AI-driven insights. Our platform bridges the gap between traditional farming and modern science, providing tools for soil analysis, crop selection, and disease prevention.

2. Dashboard Overview

The MyAgrii dashboard is your central hub for all agricultural activities. From here, you can quickly access prediction modules, view your history, and manage your field data at a glance.

3. Getting Started

- * Registration: Sign up using your name, email, and a secure password.
- * Login Security: MyAgrii features a secure 3-device session limit to protect your data.
- * Profile Management: Update your location and agronomist title in the Profile section to localize your prediction results.

4. Core AI Modules

4.1 Soil Suitability Analysis

Input environmental parameters such as Temperature, Humidity, Precipitation, and Wind Speed to determine if your soil is favorable for cultivation. The system provides a suitability score and detailed scientific analysis.

4.2 Crop Recommendation

By analyzing nitrogen (N), phosphorus (P), potassium (K), pH levels, and rainfall, MyAgrii recommends the top 3 crops most likely to thrive in your specific soil conditions.

6. Utility Features

6.1 Smart AI Chatbot

Integrated with Gemini 1.5 Flash, our chatbot provides real-time answers to your agricultural questions,

MyAgrii User Manual

offering advice on pest control, irrigation, and best practices.

6.2 Data Export & Reports

Need to share your findings? Use the Export Data feature in your Profile to receive a professional PDF report of your complete prediction history via email.
